## **Bond Investor Presentation**

24 November 2021

### Important information - Disclaimer

This presentation and the information contained herein have been prepared by and is the sole responsibility of Protector Forsikring ASA (the "Company"). Such information is being provided to you solely for your information and may not be reproduced, retransmitted, further distributed to any other person or published, in whole or in part, for any purpose. Failure to comply with this restriction may constitute a violation of applicable securities laws. The information and opinions presented herein are based on general information gathered at the time of writing and are therefore subject to change without notice. The Company assumes no obligations to update or correct any of the information set out herein.

These materials may contain statements about future events and expectations that are forward-looking statements. Any statement in these materials that is not a statement of historical fact including, without limitation, those regarding the Company's financial position, business strategy, plans and objectives of management for future operations is a forward-looking statement that involves known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such forward-looking statements are based on numerous assumptions regarding the Company's present and future business strategies and the environment in which the Company will operate in the future. The Company assumes no obligations to update the forward-looking statements contained herein to reflect actual results, changes in assumptions or changes in factors affecting these statements.

This presentation does not constitute or form part of, and is not prepared or made in connection with, an offer or invitation to sell, or any solicitation of any offer to subscribe for or purchase any securities and nothing contained herein shall form the basis of any contract or commitment whatsoever. No reliance may be placed for any purposes whatsoever on the information contained in this presentation or on its completeness, accuracy or fairness. The information in this presentation is subject to verification, completion and change. The contents of this presentation have not been independently verified. While the Company relies on information obtained from sources believed to be reliable, it does not guarantee its accuracy or completeness. Accordingly, no representation or warranty, express or implied, is made or given by or on behalf of the Company or any of its owners, directors, officers or employees or any other person as to the accuracy, completeness or fairness of the information or opinions contained in this presentation. None of the Company, its affiliates or any of their respective advisors or representatives or any other person shall have any liability whatsoever (in negligence or otherwise) for any loss howsoever arising from any use of this presentation or its contents or otherwise arising in connection with the presentation. The Company's securities have not been and will not be registered under the US Securities Act of 1933, as amended (the "US Securities Act"), and are offered and sold only outside the United States in accordance with an exemption from registration provided by Regulation S of the US Securities Act.

This presentation should not form the basis of any investment decision. Investors and prospective investors in securities of any issuer mentioned herein are required to make their own independent investigation and appraisal of the business and financial condition of such company and the nature of the securities. Any decision to purchase securities in the context of a proposed offering of securities, if any, should be made solely on the basis of information contained in any offering documents published in relation to such an offering. For further information about the Company, reference is made public disclosures made by the Company, such as filings made with the Oslo Stock Exchange, periodic reports and other materials available on the Company's web pages.

### Summary of risk factors (please confer risk factors on slides 45-48)

#### Risks related to the two potential bond issues, being (i) a Restricted Tier 1 Own Funds instrument and (ii) a Subordinated Tier 2 Own Funds instrument (together, the "Bonds" and each a "Bond Issue")

- Each bond constitutes a subordinated obligation for the Issuer and rank as described in the Bond Terms. There is a risk that the Bondholders will lose their investment in both of the two Bond Issues entirely or partly, if Protector Forsikring ASA's (the "Issuer") assets are insufficient upon insolvency or liquidation. The risk of losing the invested money in whole or in part is higher for investments in the Restricted Tier 1 Own Funds instrument since this capital class is more subordinated and will bear losses prior to the Subordinated Tier 2 Own Funds instrument.
- Investing in the Bonds involves inherent risks, and an investment in the bonds is suitable only for investors who understand the risk factors associated with the investment and can afford a loss of all or part of their investment.
- The risks and uncertainties described in this presentation are risks of which Protector considers to be most material (in each category) to its business. If any of these risks were to occur, the Issuer's business, financial position, operating results or cash flows could be materially adversely affected, and the Issuer could be unable to pay interest, principal or other amounts on or in connection with the Bonds.
- Future profitability depends on the quality of underwriting and risk selection in the various product lines where the Issuer is active.
- Current insurance provisions may be inadequate should there be future changes in factors that impact these estimates.
- Declines in financial markets may impact earnings from the investment portfolio, introduce mismatches between assets and insurance liabilities and impact solidity/solvency margin.
- The Issuer is subject to extensive regulatory requirements, including but not limited to Solvency II. These regulatory requirements may be amended, and the regulator's interpretation of current requirements may be amended, with a potential detrimental effect on the Issuer's business activities.
- The Issuer has historically been competitive through low cost, a loss of this cost advantage may impact future profitability and competitive position.

#### Risk factors that especially apply to Restricted Tier 1 Own Funds instruments ("RT1")

- The RT1 Bond issue is a perpetual bond issue with no maturity date but may be redeemed by the Issuer at its discretion five years from issuance and onwards, provided the conditions for redemption (as described in the Term Sheet) are all met including but not limited to the continued solvency of the Issuer and the Issuer Group and an approval from the Issuer Supervisor.
- Interest payments under the Restricted Tier 1 instrument may be optionally or mandatorily cancelled. The interest payment obligations of the Issuer under the Bond Terms are conditional upon the Issuer being Solvent at the time of payment and still being solvent immediately thereafter (the "Solvency Condition"). Other than in a Bankruptcy Event, no amount will be payable under or arising from the RT1 Bonds except to the extent that the Issuer could make such payment in satisfaction of the Solvency Condition. Any actual or anticipated cancellation or of interest payments is likely to have an adverse effect on the market price of the RT1 Bonds.
- A breach of Solvency capital requirement as stated in the Bond Terms may result in a permanently or temporarily write down of the principal amount, in whole or in parts. A write down may lead to a reduction of the denomination of each Bond in the CSD in order to achieve a *pro rata* reduction between the Bondholders, and *pro rata* drawing between the Bonds. A write down may be reinstated at the discretion of the Issuer.

#### Risk factors that especially apply to Subordinated Tier 2 Own Funds instruments ("Tier 2")

- The Tier 2 Bonds are scheduled to be redeemed at their principal amount on their maturity date (the "Maturity Date") provided that on such date that there is no suspension of redemption as described in the Bond Terms are fulfilled, including but not limited to the continued solvency of the Issuer and the Issuer Group and the approval by the Issuer Supervisor has been obtained. The Issuer is under no obligation to redeem the Tier 2 Bonds at any time before the Maturity Date, and the Bondholders have no right to call for their redemption. If the Issuer does not fulfil its Solvency Condition, the Maturity date may be postponed without any compensation other than the accrual of coupons.
- Interest payments under the Subordinated Tier 2 instrument may be optionally or mandatorily deferred. Any deferred interest is accumulated but will not carry any interest. The interest payment obligations (including any deferred interest) of the Issuer under the Bond Terms is conditional upon the Solvency Condition. Other than in a Bankruptcy Event, no amount will be payable under or arising from the Tier 2 Bonds except to the extent that the Issuer could make such payment in satisfaction of the Solvency Condition. Any actual or anticipated deferral or of interest payments is likely to have an adverse effect on the market price of the Tier 2 Bonds.

### Issuer characteristics

#### Issuer characteristics

- Protector Forsikring ASA (the "Issuer"), headquartered in Oslo, Norway, was founded in 2004 and is listed on the Oslo Stock Exchange under the ticker PROT with a current market cap of 8.6 <sup>(1)</sup> bnNOK. The Issuer has a Issuer Credit Rating of bbb+ (Good) Stable Outlook from leading insurance rating provider A.M. Best
- The Issuer offers P&C insurance for large and medium-sized companies and the public sector in Norway, Sweden, Denmark, Finland and the UK. Henrik Høye

#### **Previous experience**

- Employed at Protector since 2007
- Responsible for building Protector's Public sector initiative
- · Comes from the position as Director UK and Public Sector

• BSc in Finance, Leeds School of Business & BSc in Economics, College of Arts and Sciences from University of Colorado

#### **CFO**

Ditlev de Vibe Vanay

#### **Previous experience**

- CFO in Protector from 2005-2015 and from 2019
- Insurance, finance, business controlling and IT in Protector, Storebrand, If and Tinde

#### **Education**

• MSc in Economics and Business Administration from BI

# Agenda

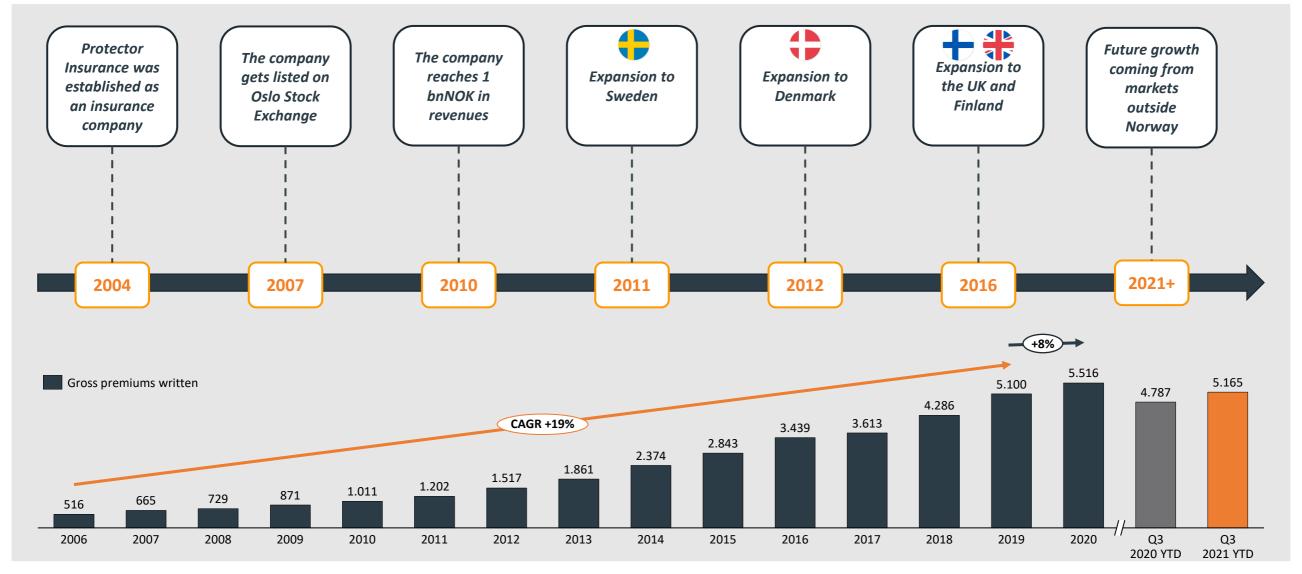

- 1. Introduction to Protector Insurance
- 2. Business Segments and Customers
- 3. Investments
- 4. Financials
- 5. Q&A
- 6. Risk Factors
- 7. Appendix

### A 17 year young company, growing organically from 0 to 5.5 bnNOK

PROTECTOR insurance

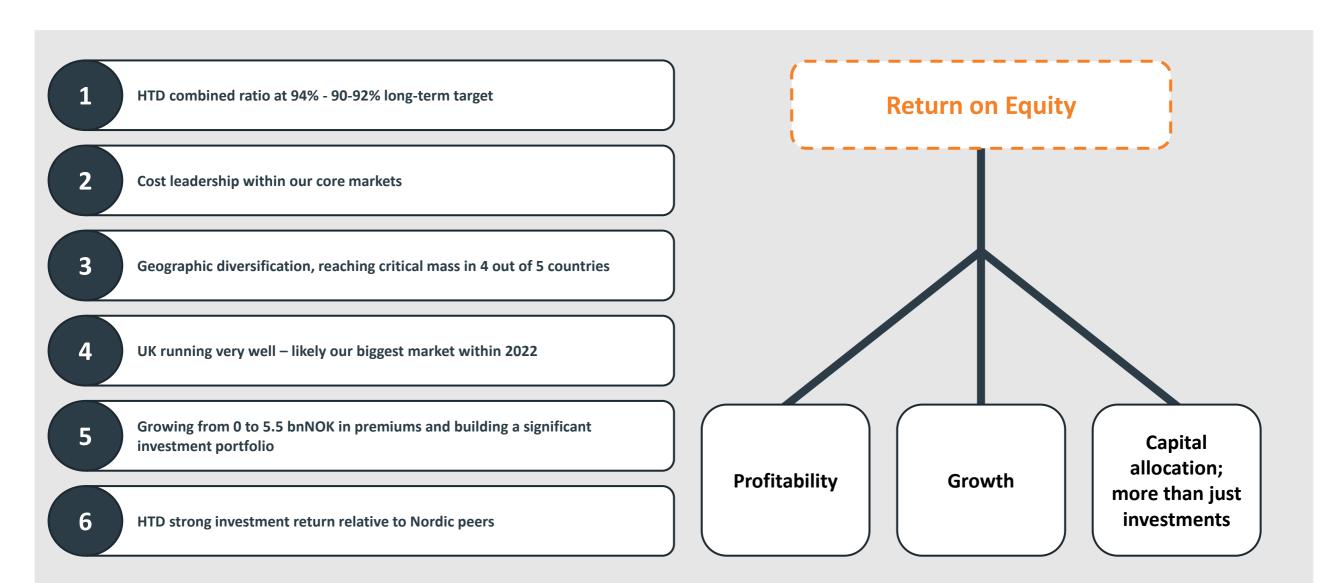

Operations in Norway, Sweden, Denmark, Finland and the UK

### Historical to date success story

#### With further reduced risk going forward

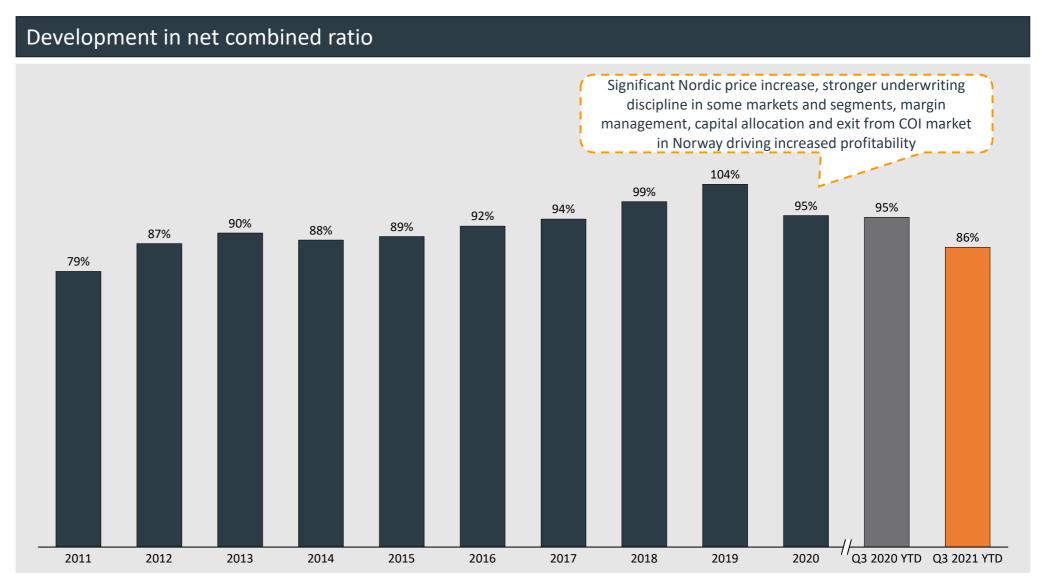

### Profitability back on track

Actions taken to tackle the challenges faced during 2017-2019

- Protector has managed to maintain profitability over the last nine out of ten years
- Deteriorating profitability entering 2018. Main reasons;
- Price pressure over time (known risk)
- Poor UW discipline in Norway and Denmark (understood too late)
- Higher than expected claims inflation in the motor segment (acted on too late)
- Challenges related to Grenfell Tower (extreme event) and Grey Silverfish (extreme event) – all occurring simultaneously
- Profitability improved significantly in 2020 and 2021, and is expected to remain healthy going forward

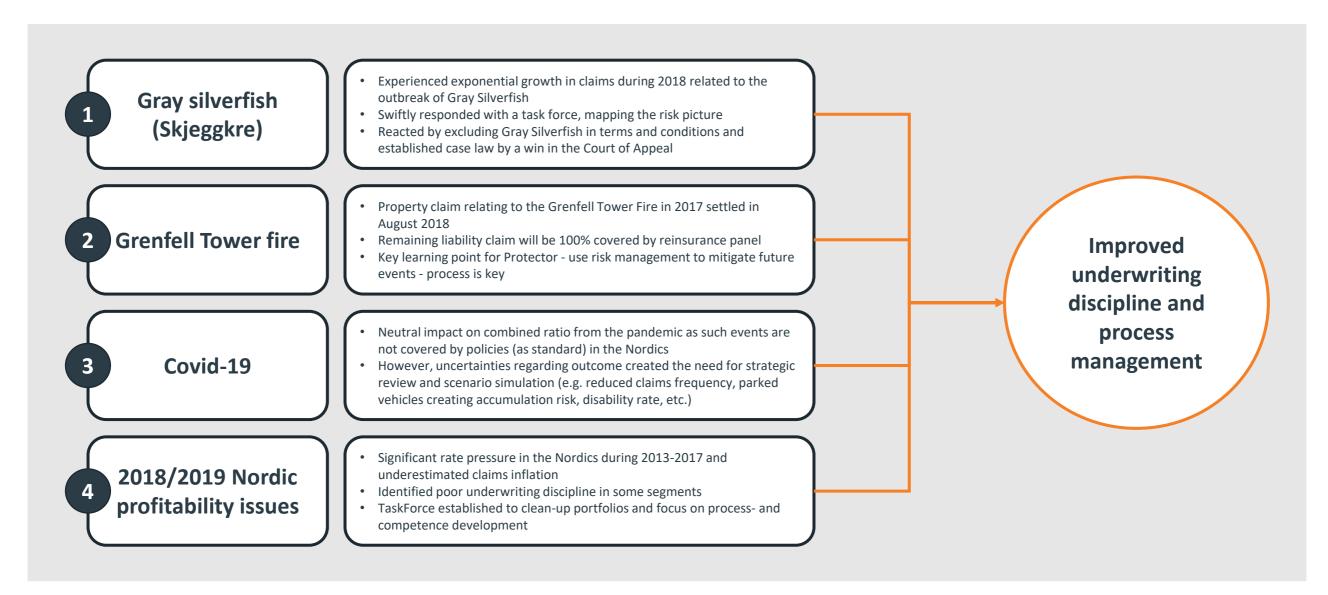

## Prior events creating important learning points for future operations **PROTECTOR**

Important lessons learned with regards to underwriting discipline supporting decision making going forward

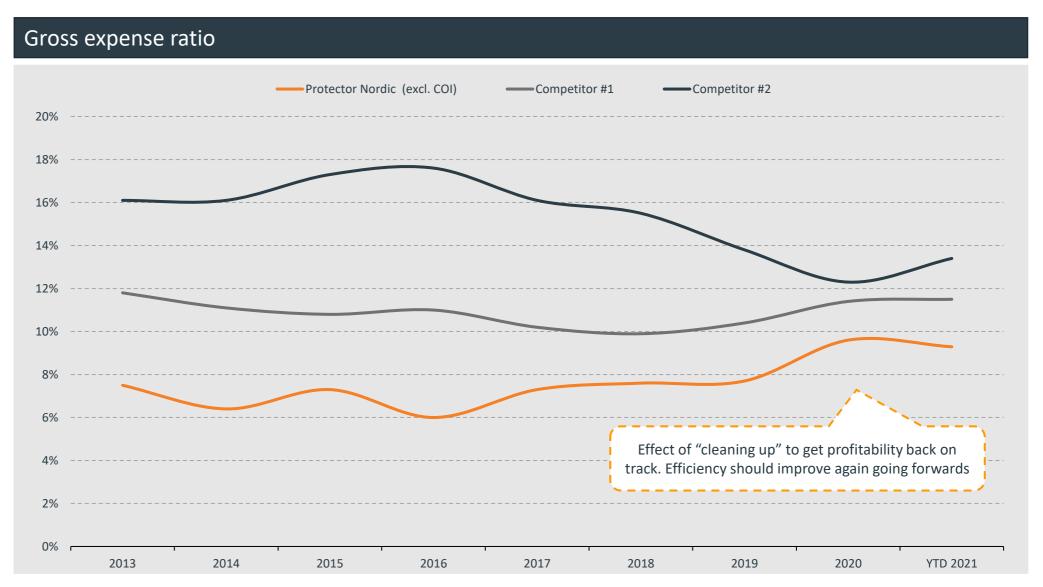

### Cost development

#### **Cost efficiency yielding flexibility relative to competitors**

- A consistent strategy, welldesigned value chains and great implementation is key to maintaining low costs
- In-house IT with cost ratio of ~1% vs 3.2% for industry<sup>(1)</sup>
- It is expensive to clean up and get profitability back on track.
   Hence, a negative development of cost ratio 2017-2020.
- Efficiency will gradually improve going forward.
   Economies of scale will come to effect as portfolio grows, but investments in quality will still be in focus

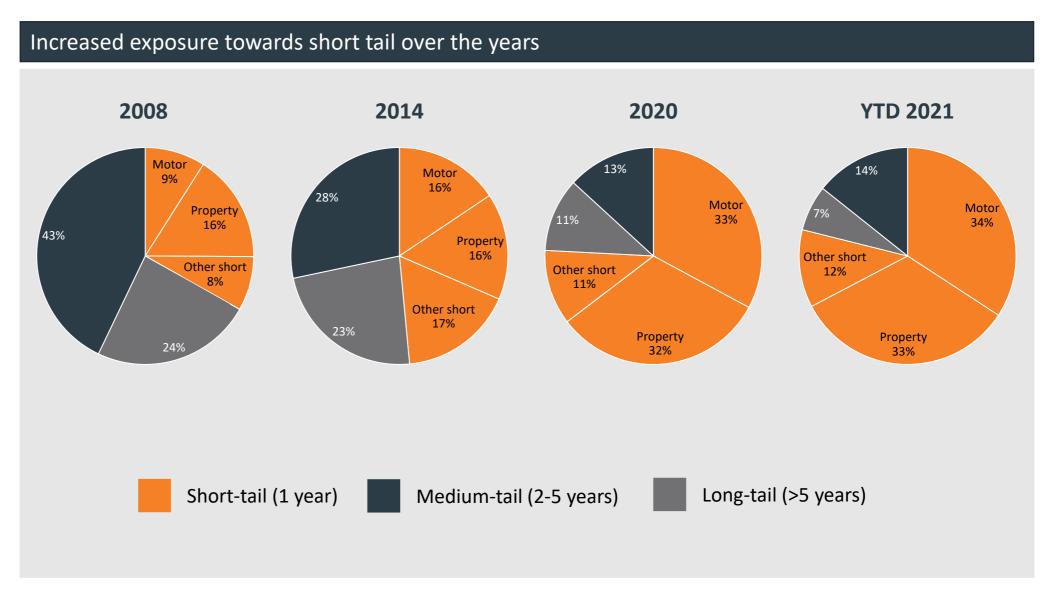

### Product mix development<sup>(1)</sup> – shifted towards short tail

Reduced risk profile and reduced capital consumption

- Short tail from 34% in 2008 to 79% in 2021
- Long tail attractiveness decreasing together with declining interest rates
- Geographical diversification increased; four countries at critical mass
- Motor increasing from 9% in 2008 to 34% in 2021
- Average capital consumption per GWP in current portfolio at 33% vs 45% in 2014

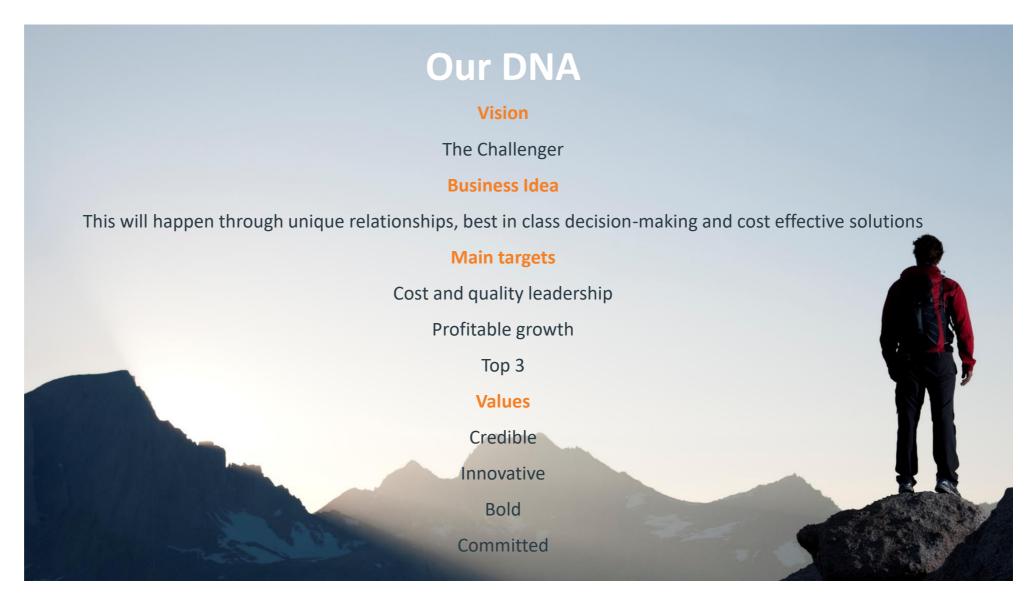

### Strategy – well defined and consistent

Cost and quality leadership should lead to profitable growth and put us top 3 in any segment we enter

- All Property and Casualty products
- Competitive prices (supported by cost leadership)
- Broker distribution only
- USP: easy to do business with, commercially attractive and trustworthy
- Market segments medium to large companies and public sector

### **ESG Strategy**

#### We aim to be a responsible, trusted, and credible ESG actor

The importance of environmental, social and governmental factors increases. The necessity of proper ESG management is substantial to keep market position and to be considered as a responsible business partner. To accelerate our business, meet market expectations and reduce own, customers' and investors' risks, ESG related activities needs to be integrated into business operations. To have transparent communication and meet investors' and regulatory expectations on the subject, our reporting needs to include non-financial criteria on ESG topics, such as contribution, risk management and progress.

To set the direction, we performed an analysis to identify material ESG impact on our value chain, risks and opportunities, on the basis of key stakeholders view, market developments and strategic priorities. Given the output, four strategic ESG Pillars considered as material to our business was defined, and engaging us to:

- (1) commit to people value and employee engagement in our organization
- (2) encourage and motivate our insured to choose circular and climate efficient options in claims
- (3) focus on climate resilience to accommodate market needs, to adapt and mitigate climate change
- (4) have responsible business behaviour at the heart of our operations

To succeed with our ambition of being a responsible, trusted, and credible ESG actor, the established roadmap points out a set of required activities that gradually contributes to achievement of each Pillar by the end of 2024. Along our ESG journey, we will continuously focus on doing the right things, and shaping future conversations by engaging with our stakeholders to understand and reduce ESG risks, and communicate this through transparent reporting.

Based on our strategic pillars, five primary UN Sustainability Development Goals (SDGs) are prioritized on what we believe Protector contributes the most. The selected SDGs emphasize Protector's work on the strategic topics, but also emphasize how Protector proactively contributes to the UN SDG initiative.

### At the end of 2021, the following directive are leading for Protector's ESG strategy:

- · EU mandatory climate related financial disclosure
- EU Taxonomy
- EU Corporate Due Diligence
- Norwegian Equality and Anti-Discrimination Act
- UK Gender Pay Gap Regulation
- Norwegian and EU corporate supplier due diligence reporting requirements
- Norwegian Transparency Act (Åpenhetsloven)
- Norwegian regulation of Public Procurement (Anskaffelsesforskriften)
- NFRD/CSRD EU regulatory ESG reporting

### Protector's five primary SDG's to which we contribute most, based on our materiality assessment:

### Protector is a responsible, trusted and credible ESG actor

### Accelerating our business through leveraging sustainability

We commit to people value and employee engagement in our organisation

- Diversity and inclusion in our work place
- Labour and human rights in supply chain
- Norwegian Equality and Anti-Discrimination Act, UK Gender Pay Gap Regulation
- Norwegian and EU corporate supplier due diligence reporting requirements
- Increased pressure and concern on diversity and equality commitment disclosures

We encourage and motivate our insured to choose circular and climate efficient options in claims

- Circularity and use of residual values in claim settlements
- Climate footprint in claim settlements
- Safety precautions to prevent damages
- Public demands to choose circular alternatives whenever possible in claims
- Customer expectations that circularity in claims will be of sufficient quality
- Requirements of minimum 30% environmental criteria in public procurement

We focus on climate resilience to accommodate market needs, to adapt and mitigate climate change

- Climate resilience factors in product development and pricing
- Climate risk management routines and processes
- Up-to-date climate-related reporting
- EU mandatory climate related financial disclosure
- EU Taxonomy
- Confirmed physical consequences of climate change that will pose risk to Protector

We have responsible business behaviour at the heart of our operations

- Responsible business behaviour in our own operations
- Responsible business behaviour in our external relationships
- Responsible investments
- EU Corporate Due Diligence
- Investors and banks are requesting standardized information and disclosures on risk management and business ethics compliance

Priority Focu

# Agenda

- 1. Introduction to Protector Insurance
- 2. Business Segments and Customers
- 3. Investments
- 4. Financials
- 5. Q&A
- 6. Risk Factors
- 7. Appendix

### Geographically diversified revenue base

Primary exposure to the Nordics, UK market growing

- Operations within the Public and Commercial sectors
- Norwegian market entered at inception of Protector, 2004

- Operations within the Public and Commercial sectors
- Swedish market entered in 2011

- Operations within the Public and Commercial sectors
- Danish market entered in 2012

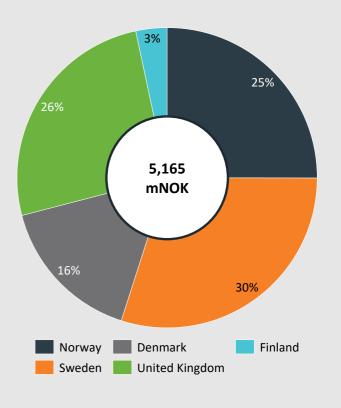

- Operations within the Public and Commercial sectors
- UK market entered in 2015
- Reached 1.0 bnNOK GWP in 2020

- Operations within the Public and Commercial sectors
- Finnish market entered in 2016

## Top 3 in any segment we enter

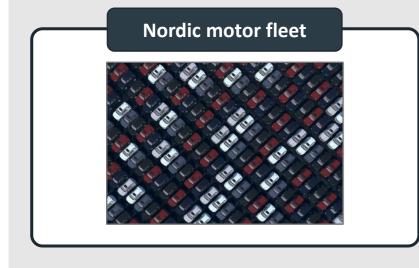

**Brokered Insurance Nordics & Public Sector UK** 

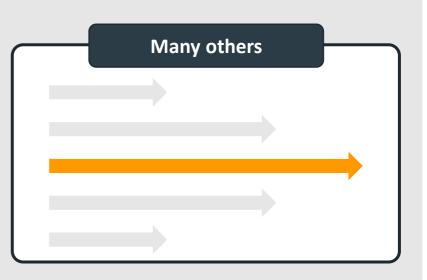

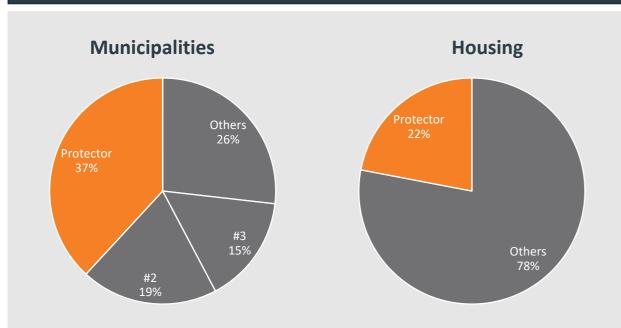

### Nordic market position

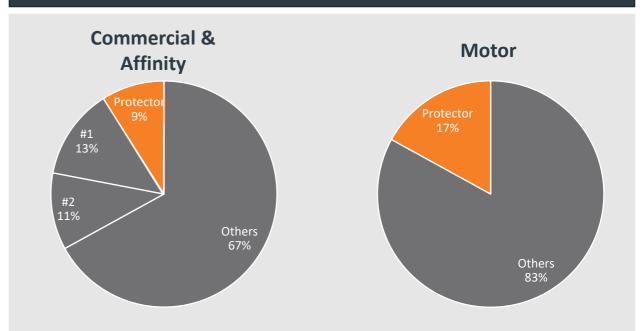

### Public Sector – 3.0 bnNOK– market leader by far

- Public sector is dominated by 2-3 insurers in each market
- Mutual insurers are significantly represented in all markets
- · Cost efficiency is critical to succeed

### Commercial and Affinity – 30.0 bnNOK– top 3

- Commercial and Affinity is dominated by 3-4 local insurers
- · International subsidiaries are focusing on niches
- · Cost and quality is key for profitable growth

### Nordic commercial sector

69% of Nordic revenues (1)(2)

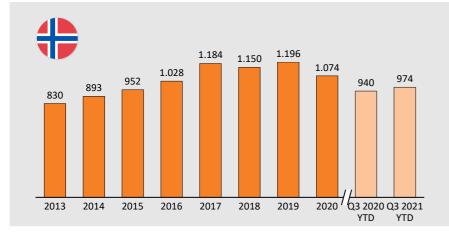

#### Summary

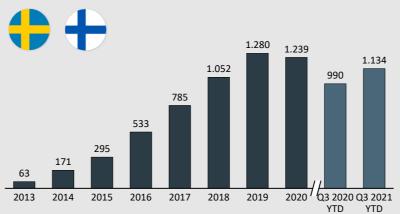

- Corporate clients with a minimum size of 0.2 mNOK
- Standardised accounts; Property, Motor, Liability, Workers Compensation, Group Life, Other Insurance, Accident, Health and Cargo
- Similar underwriting process in all countries; securing efficiency and quality in decisionmaking
- Underwriters, risk-engineers, key account managers and management present in underwriting meetings

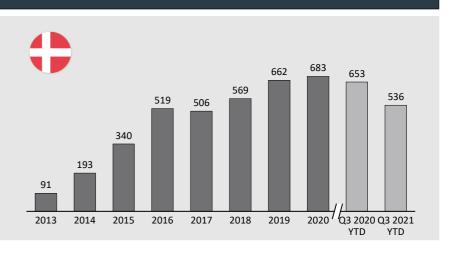

### Market drivers

- · Cost and quality leadership
- Protector's market appetite in the Nordics surpasses 30 bnNOK
- Market dominated by a few large players in each market with approximately 75% of the market

### Revenue development per country – Gross written premiums (mNOK)(1)

Note: (1) Excluding COI. (2) As of Q3 YTD 2021

31% of Nordic revenues (1)(2)

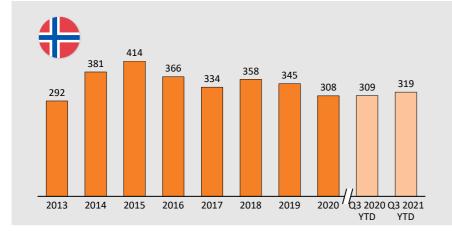

#### Summary

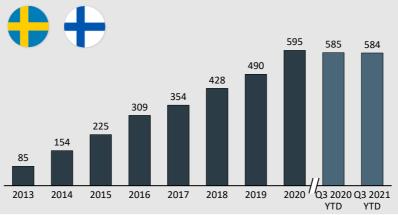

- Protector is the market leader in the Nordics
- Insuring more than 600 municipalities
  - 280 Norwegian, 240 Swedish and 80 Danish clients
- Protector quotes all tenders and all product lines
- Underwriting in the Nordics is centralised from Oslo
- Service and claims handling locally

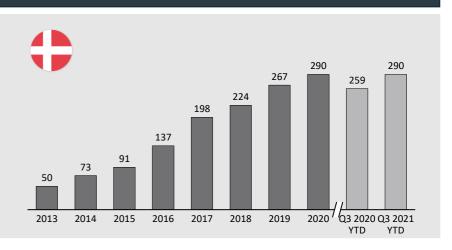

### Market drivers

- Few players and though market conditions
- Tender processes are governed by public procurement regulation
- Average tender evaluation criteria 30% quality and 70% price
- Nordic market appetite is more than 2.0 bnNOK

### Revenue development per country – Gross written premiums (mNOK)(1)

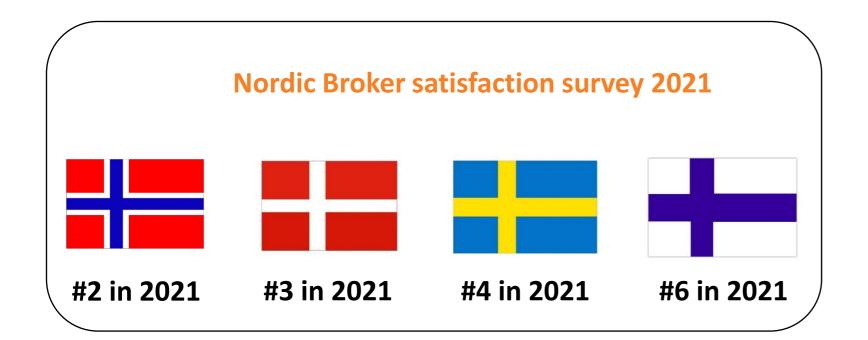

Note: (1) Excluding COI. (2) As of Q3 YTD 2021

## Quality setbacks in the Nordics

Work hard to get back on top

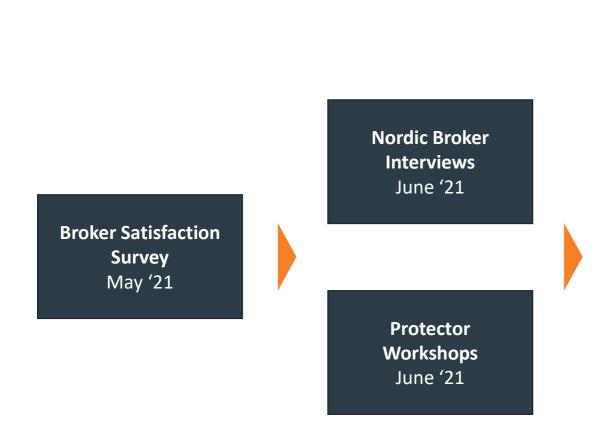

### Quality Leadership is our promise to the brokers

Analyse, discuss, prioritize, act -> back on top

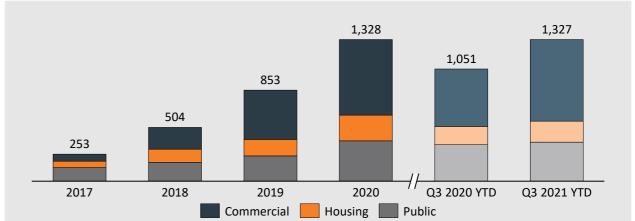

## A disciplined Team Journey has just begun

Likely to become our biggest market by 2022

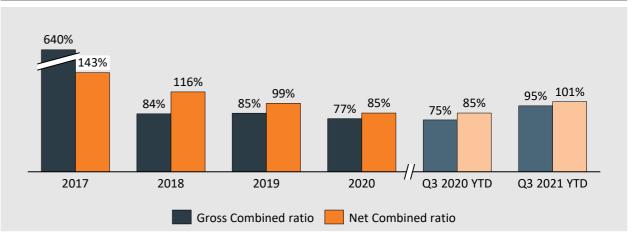

## The UK market Commercial Careful entry, one team. Gradually expanding distribution; on 3 broker panels GBP 9bn **Public Sector** Currently positioned as Nr. 3 in the market, clear underwriting and cost advantage GBP 0.6bn Housing Currently positioned as Nr. 3 in the market, clear associations underwriting and cost advantage GBP 0.3bn

# Revenue development – gross written premiums (mNOK)

#### Combined ratio

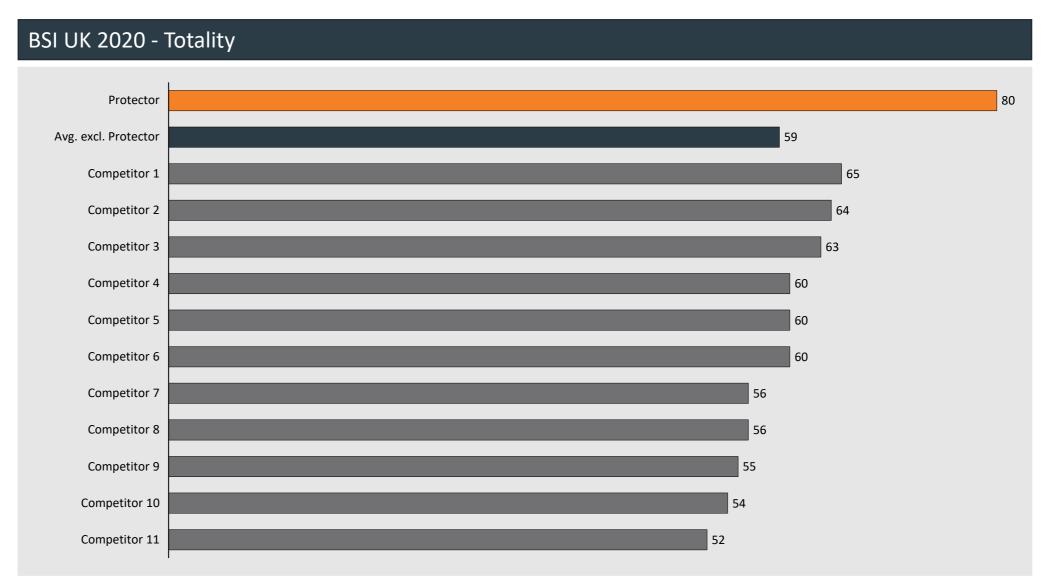

### The Quality Leader in the UK, three years in a row

### **PROTECTOR** insurance

#### Proud, but humble

- #1 on quality according to 120 respondents from broker partners
- 4<sup>th</sup> year running
- Feedback supported by Brokers' own surveys
- Measure, understand and improve

# Agenda

- 1. Introduction to Protector Insurance
- 2. Business Segments and Customers
- 3. Investments
- 4. Financials
- 5. Q&A
- 6. Risk Factors
- 7. Appendix

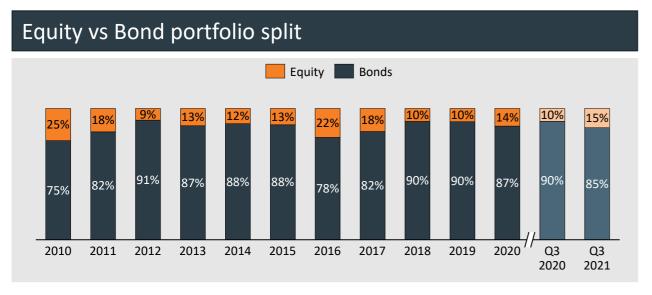

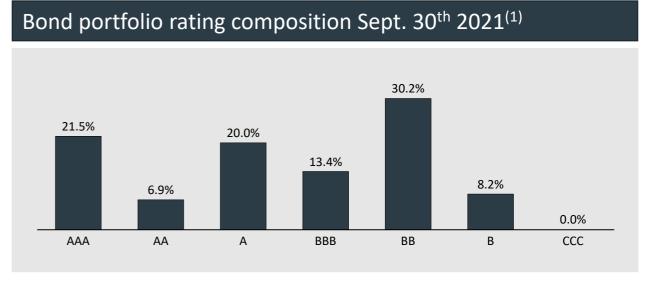

### Investment portfolio heavily weighted towards bonds

Priority #1 is to never allow any risk for solvency issues or fire sale

#### Development in assets under management NOK 14.5bn NOK 13.5bn NOK 13.4bn NOK 10.9bn NOK 9.5bn NOK 9.4bn NOK 7.5bn NOK 6.6bn NOK 5.0bn NOK 4.0bn NOK 3.2bn NOK 2.4bn NOK 2.0bn 2010 2011 2012 2013 2014 2015 2016 2017 2018 2019 2020 Q3 2020 YTD Q3 2021 YTD

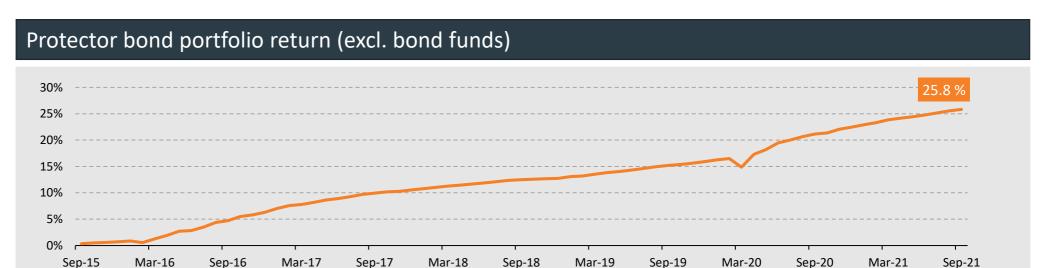

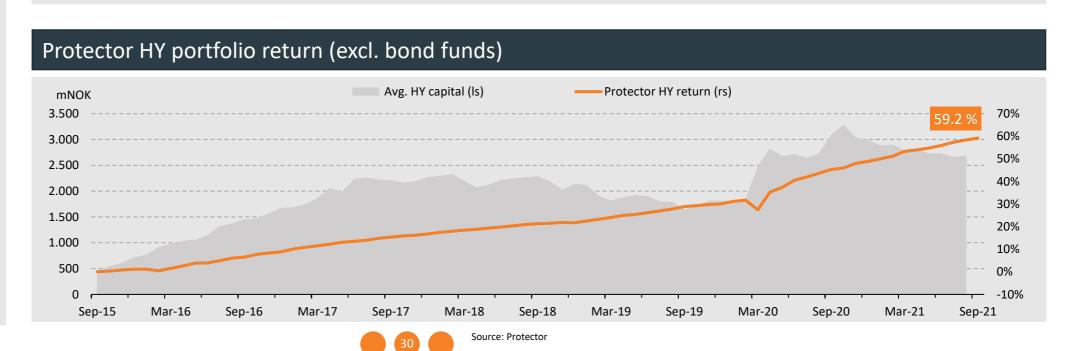

### Bond portfolio returns

Stable returns with low risk and low capital consumed

- Historically performed well during periods of high volatility, e.g.:
  - Q1 2020 (COVID outbreak)
  - Q1 2016 (oil price plunge)
- The bond portfolio has seen very limited losses over the previous five years
- Investment in risk assets only when meeting our internal hurdle rate
- Return from the bond portfolio must be evaluated over a credit cycle

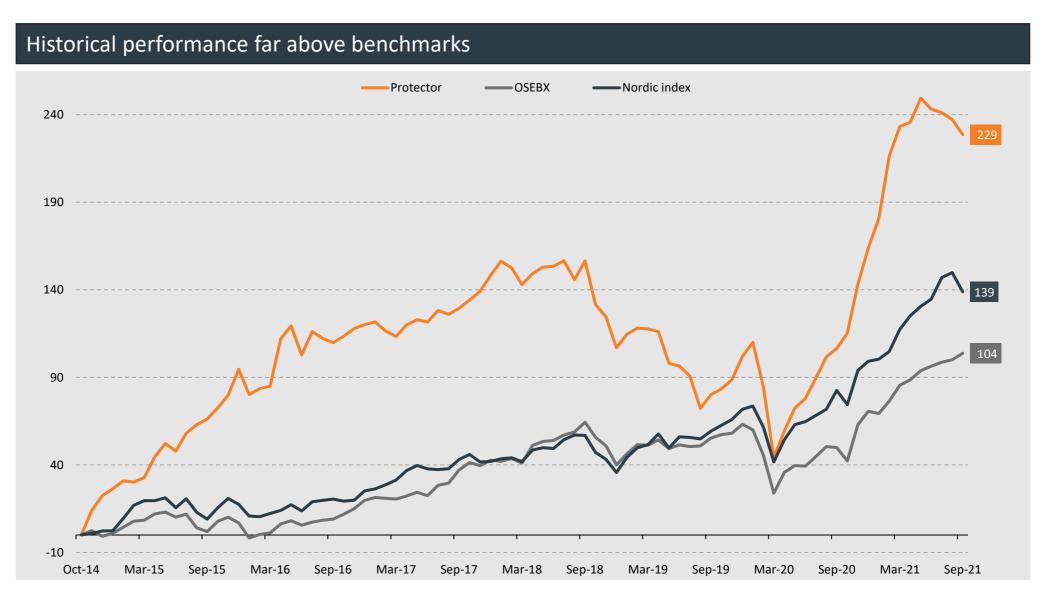

### Equity portfolio statistics

- Equity portfolio currently comprises 14.6% of the total investment portfolio
- Historically returned 18.6% p.a.
- Discount to estimated intrinsic value currently at 30%
- Currently 22 companies in the portfolio
- Put options used to limit market exposure

# Agenda

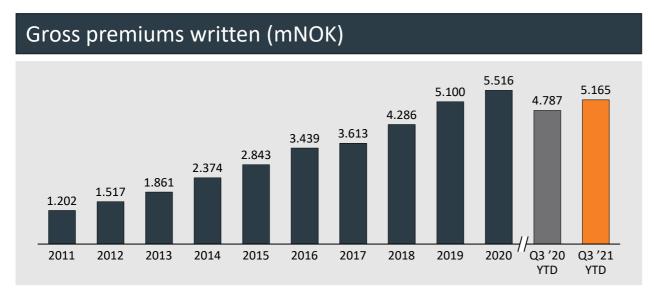

- 1. Introduction to Protector Insurance
- 2. Business Segments and Customers
- 3. Investments
- 4. Financials
- 5. Q&A
- 6. Risk Factors
- 7. Appendix

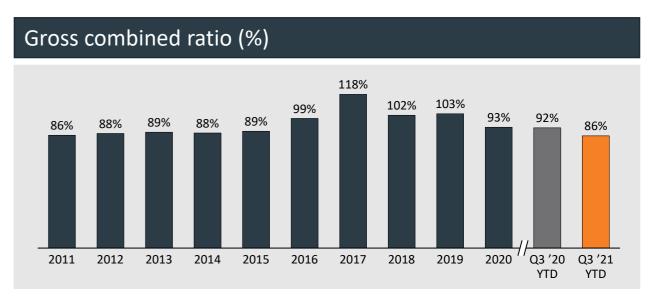

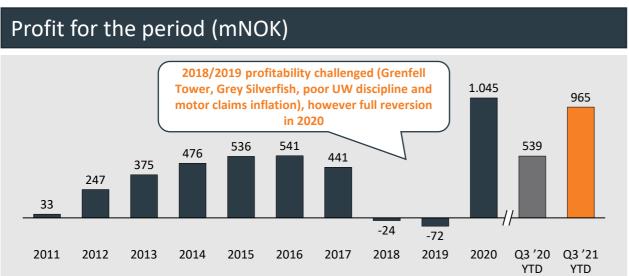

### Profitability and solidity through a prolonged growth period

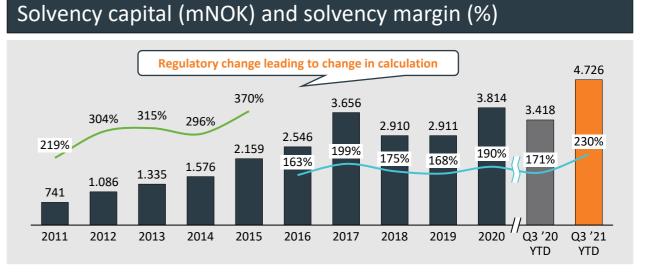

More disciplined approach towards growth going forward, profitability always comes first

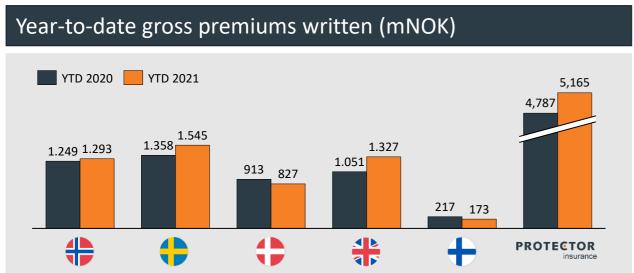

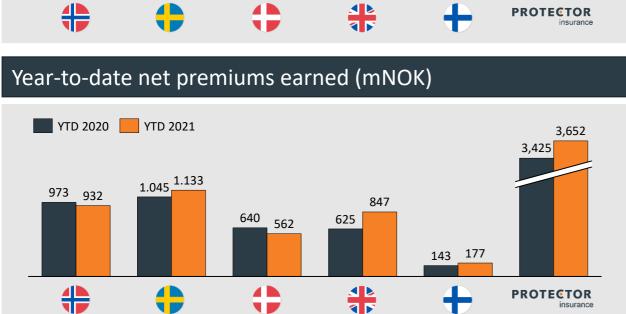

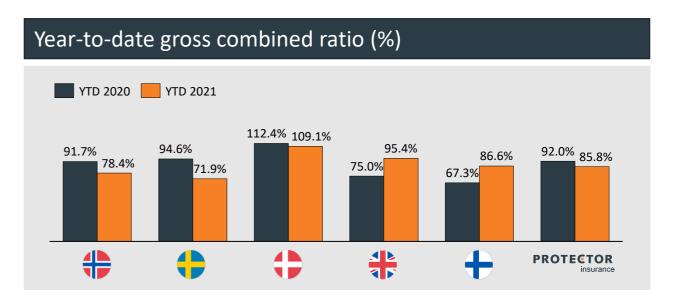

### Key metrics by country

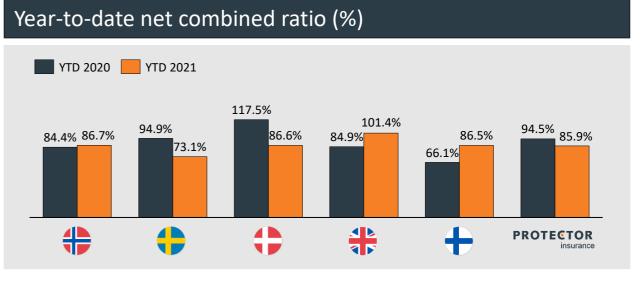

YTD combined ratio at 85.9%

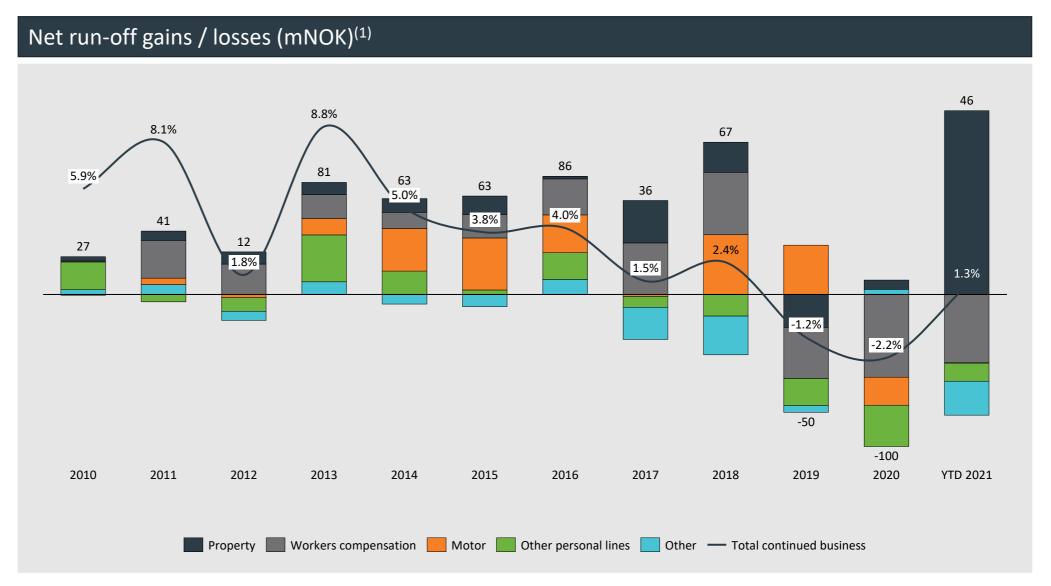

### Prudent reserving practice

- Reserves are volatile in some products, however Protector had total run off gains of 325 mNOK (excl. COI) in the period 2010 – 2020
- Significant de-risking of reserves through exit of change of ownership insurance (COI) and WC Norway and DK (sale to DARAG)
- Disciplined growth in the UK with large short-tail exposure and more reinsurance protection expected to reduce risk even further going forward

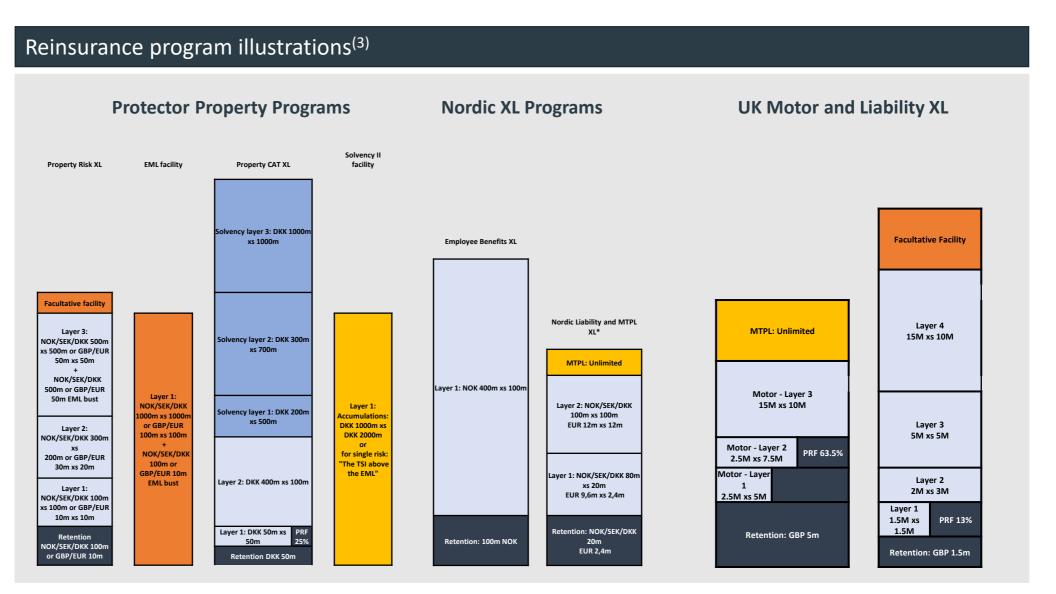

### Reinsurance XL Program<sup>(1)</sup> – 2021<sup>(2)</sup>

Solid panel of reinsurers, (+99%) placed with a rating of A- or better

- All lines of business have reinsurance protection
- Programs have "back-to-back" coverage with our standard terms and conditions (no gaps in coverage)
- · Solid panel of reinsurers, (+99%) placed with a rating of A- or better
- Protectors maximum retention level is 100 mSEK/NOK/DKK or 10 mGBP/EUR
  - For any type of event, or any type of loss

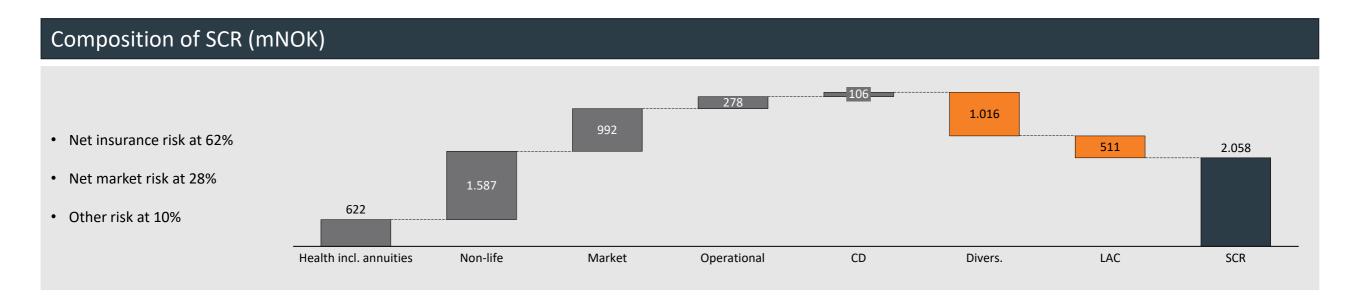

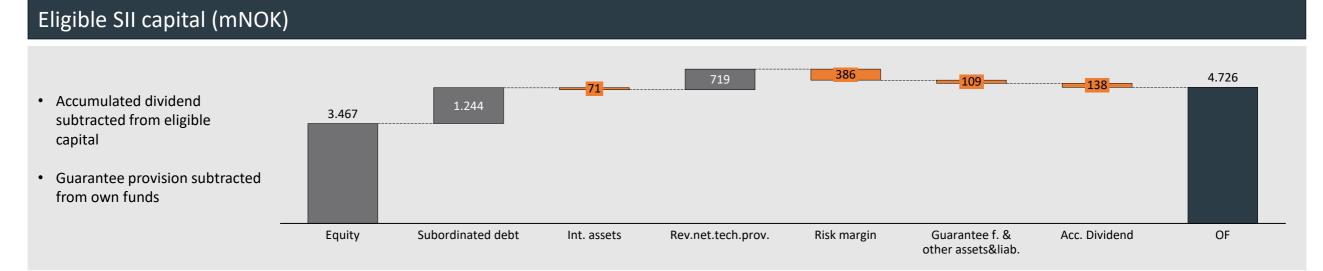

# Solvency II

**SCR ratio currently at 230%** 

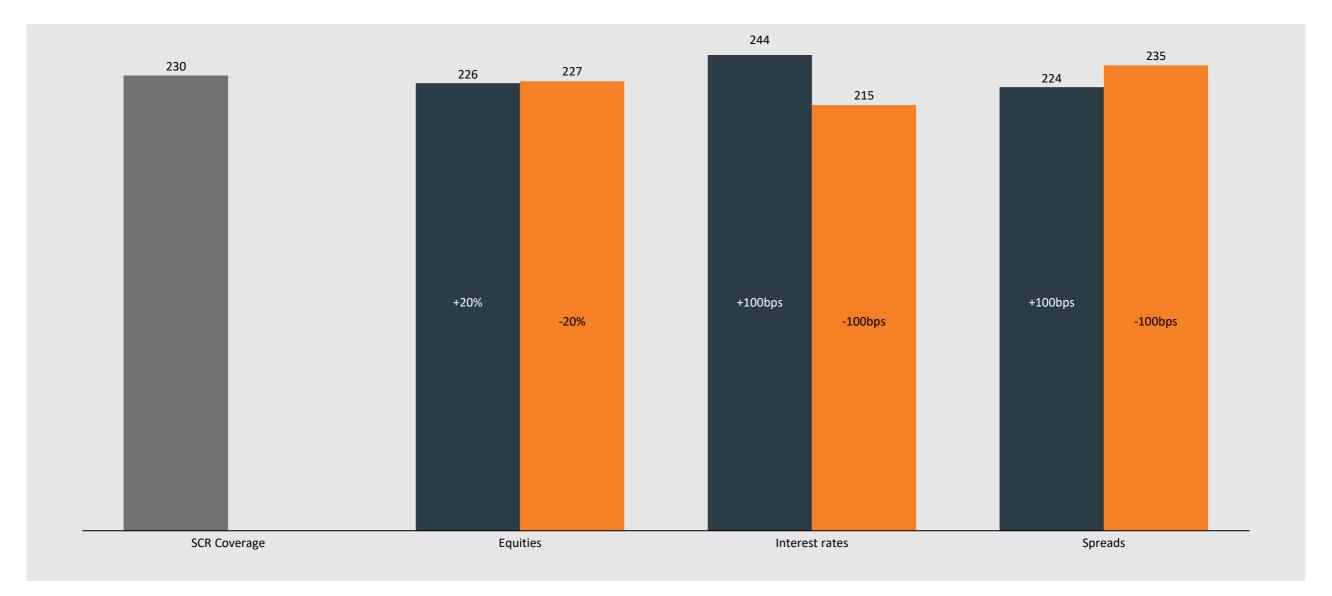

# Solvency II sensitives

# Distribution policy

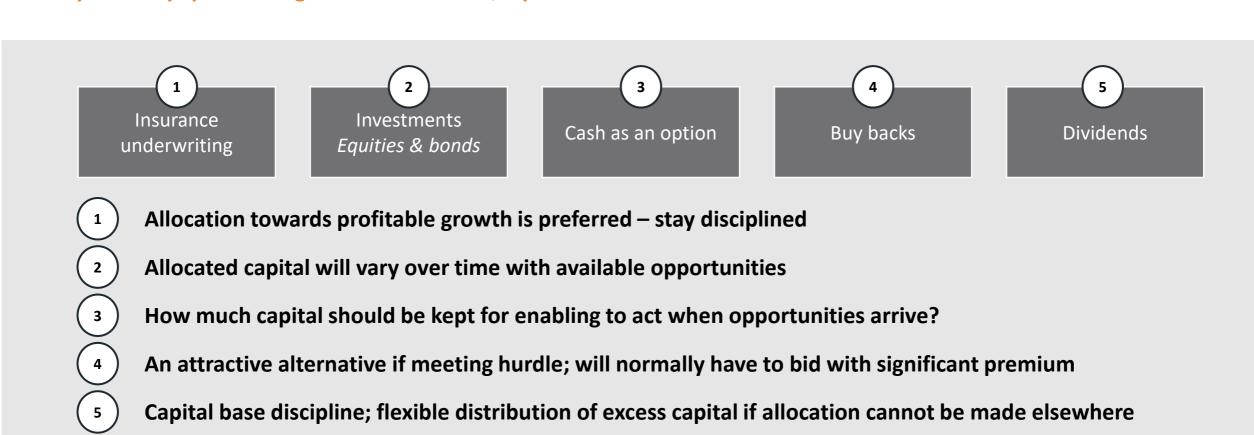

Flexible distribution policy – profitable growth in insurance and sufficient SCR buffer always priority nr 1

# Capital allocation – maximize shareholder return, but "never bet the farm"

Priority 1: Always profitable growth in insurance, if possible

Capital allocation approach

- Determine minimum hurdle rate (RoE>20%)
- Calculate returns for all internal and external allocation alternatives available, by return and risk
- Deploy capital in the most attractive alternatives above hurdle
- Release underperforming capital (COI, Price increases, WC Denmark and Norway as examples)

# Risk factors (1/4)

#### Risks related to the two potential bond issues, being (i) a Restricted Tier 1 Own Funds instrument and (ii) a Subordinated Tier 2 Own Funds instrument (together, the "Bonds" and each a "Bond Issue")

- Each Bond constitutes a subordinated obligation for the Issuer and rank as described in the Bond Terms. There is a risk that the Bondholders will lose their investment in both of the two Bond Issues entirely or partly, if the Issuer's assets are insufficient upon insolvency or liquidation.
- The Bondholders may lose their investment in the Bond Issues entirely or partly if the Issuer's assets upon insolvency or liquidation are insufficient to cover the claims of more senior-ranking creditors in full, in which case the Bondholders lose their entire investment. The risk of losing the invested money in whole or in part is higher for investments in the Restricted Tier 1 Own Funds instrument since this capital class is more subordinated and will bear losses prior to the Subordinated Tier 2 Own Funds instrument.
- There is a risk that the value of the Bonds may decrease due to changes in relevant market risk factors. The price of a single bond issue will, generally, fluctuate due to general developments in the financial market, as well as, specifically, investor interest in (and, thus, the liquidity of) the Bonds. Accordingly, there is a risk that the value of the Bonds may decrease in spite of an underlying positive development in the Issuer's business activities.
- If the Issuer's early redemption right (ordinary or conditional (Regulatory Call, Tax Call and/or Rating Call) as stated in the Bond Terms) is exercised, the Call Price is 100 % of the applicable denomination at the time of an early redemption. The Call Price may limit the market value of the Bonds and an investor may not be able to reinvest the redemption proceeds in a manner which achieves a similar effective return.
- Missing demand for the bonds may result in a loss for the bondholder in the form of not getting access to liquidity through sale of the bonds but has to wait until maturity for the bonds to receive liquidity.
- The interest rate or coupon of this instrument will most likely consist of two elements: a) 3 month NIBOR and b) the Margin. The risk is associated with the variability of the sum of these two components. The Margin is fixed at issuance of the bonds and will not represent a risk for an investor as regards the interest income from the bonds. 3 month NIBOR is a reference rate for pricing of 3 month liquidity in the market and will vary over time. The coupon is reset quarterly based on actual 3 month NIBOR plus Margin. This means the risk to interest income from the bonds is associated with the changes in NIBOR. When trading this instrument, the investor is exposed to the risk of changes in market changes in 3 month NIBOR as well as changes in market changes to the margin investors are willing to trade the bonds. These changes will affect the price of the bonds.
- Interest rates and indices which are deemed to be "benchmarks", (including NIBOR) are subject of recent national and international regulatory guidance and proposals for reform. Some of these reforms are already effective whilst others are still to be implemented. These reforms may cause such benchmarks to perform differently than in the past, to disappear entirely, or have other consequences which cannot be predicted.
- There is always a settlement risk that the settlement of bonds does not take place as agreed and a credit risk that the Issuer fails to make the required payments under the Bond (either principal or interest).
- The value of the bonds may decrease due to the change in value of the market risk factors. The price of a single Bond Issue will fluctuate in accordance with the interest rate and credit markets in general, the market view of the credit risk of that particular Bond Issue, and the liquidity of this Bond Issue in the market. In spite of an underlying positive development in the Issuer's business activities, the price of a Bond may fall independent of this fact.
- No market-maker agreement is entered into in relation to the Bond Issues, and the liquidity of bonds will at all times depend on the market participants' view of the credit quality of the Issuer as well as available credit lines.
- Solvency II requirements adopted, whether as a result of further changes to Solvency II or changes to the way in which the Issuer Supervisor interprets and applies these requirements to the Issuer and/or the Issuer Group may change. Any such changes, either individually and/or in aggregate, may lead to further unexpected changes in relation to the calculation of the Solvency Capital Requirement, Minimum Capital Requirement and/or Eligible Own-Fund Items to cover the Solvency Capital Requirement or Minimum Capital Requirement, and such changes may make the applicable regulatory capital requirements more onerous. Additionally, the Issuer may be required to raise further capital pursuant to applicable law or regulation or the official interpretation thereof in order to maintain the then applicable Minimum Capital Requirement and Solvency Capital Requirement. Changes to Solvency II requirements may also increase the likelihood of a Capital Disqualification Event and subsequent early redemption of one or both of the Bond Issues by the Issuer.
- A Capital Disqualification Event may occur as a result of any replacement of, or change to (or change to the interpretation of), the Applicable Regulations after the Issue Date. Such an event may lead to the whole or a part of the Restricted Tier 1 issue no longer being qualified as Basic Own Funds Tier 1 Capital applicable to the Issuer or Issuer Group, and/or the Tier 2 Bonds no longer being qualified as Tier 2 Capital.

# Risk factors (2/4)

#### Risk factors that especially apply to Restricted Tier 1 Own Funds instruments ("RT1")

- The Bond is a perpetual bond issue with no maturity date but may be redeemed by the Issuer at its discretion five years from issuance and onwards, provided the conditions for redemption (as described in the Term Sheet) are all met including but not limited to the continued solvency of the Issuer and the Issuer Group and an approval from the Issuer Supervisor.
- Due to the status of the RT1 Bonds as direct, unsecured and subordinated debt obligations of the Issuer, in connection with a Bankruptcy Event of the Issuer, the RT1 Bonds will rank: a) pari passu without any preference among each Bond, b) pari passu with all outstanding Parity Obligations, c) in priority to payments to creditors in respect of any Junior Obligations, and d) junior in right of payment to (i.e. be subordinated to) any present or future claims of (i) policyholders of the Issuer, and (ii) any other unsubordinated creditors of the Issuer, and (iii) subordinated creditors of the Issuer other than the present and future claims of creditors that rank or are expressed to rank pari passu with or junior to the RT1 Bonds to the extent permitted by Applicable Regulations in order for the RT1 Bonds to be classified as Restricted Tier 1 Instruments. In case of a Bankruptcy Event, payments to investors in subordinated debt will depend on funds left after payments are made to unsubordinated creditors and creditors with higher ranking. This may result in a loss for the bondholder. From the status of the RT1 Bonds it also follows that the interest payments may be suspended without any accumulation. As a consequence, the investor may lose income from not receiving coupon and not being able to reinvest the interest. Finally, if the audited accounts of the Issuer show that a substantial part of its subordinated debt capital has been lost, the loss may be absorbed by reduction of the denomination without any accompanying payment to the investors.
- Interest payments under the Restricted Tier 1 instrument may be optionally or mandatorily cancelled. The interest payment obligations of the Issuer under the Bond Terms are conditional upon the Issuer being Solvent at the time of payment and still being solvent immediately thereafter (the "Solvency Condition"). Other than in a Bankruptcy Event, no amount will be payable under or arising from the RT1 Bonds except to the extent that the Issuer could make such payment in satisfaction of the Solvency Condition. Any actual or anticipated cancellation or of interest payments is likely to have an adverse effect on the market price of the RT1 Bonds.
- A breach of Solvency capital requirement as stated in the Bond Terms may result in a permanently or temporarily write down of the principal amount, in whole or in parts. A write down may lead to a reduction of the denomination of each Bond in the CSD in order to achieve a pro rata reduction between the Bondholders, and pro rata drawing between the Bonds. A write down may be reinstated at the discretion of the Issuer.

#### Risk factors that especially apply to Subordinated Tier 2 Own Funds instruments ("Tier 2")

- Due to the status of each of the Tier 2 Bonds as unsecured and subordinated debt obligations of the Issuer, in connection with a Bankruptcy Event of the Issuer, the Tier 2 Bonds will rank: a) pari passu without any preference among the Bonds; b) pari passu with all outstanding Parity Obligations; c) in priority to payments to creditors in respect of Junior Obligations; and d) junior in right of payment to any present or future claims of (i) policyholders of the Issuer. and (ii) any other obligations of the Issuer ranking or expressed to rank senior to the Tier 2 Bonds. Junior Obligations means (i) the Issuer's share capital, or (ii) any other obligations of the Issuer ranking or expressed to rank junior to the Tier 2 Bonds. In case of a Bankruptcy Event, payments to investors in subordinated debt will depend on funds left after payments are made to unsubordinated creditors. This may result in a loss for the bondholder. From the status of the Tier 2 Bonds it also follows that the interest payments may be deferred and accrual of interest on the deferred amount will be made for later payment. As a consequence, the investor may not receive timely coupon payments to spend or reinvest. Further, redemption of the principal amount at the stated maturity date may be suspended by the Issuer Supervisor if the Issuer is not in compliance with capital requirements. Finally, if the audited accounts of the Issuer show that a substantial part of its subordinated debt capital has been lost, the loss may be absorbed by reduction of the nominal value without any accompanying payment to the investors.
- The Tier 2 Bonds are scheduled to be redeemed at their principal amount on the maturity date (the "Maturity Date") provided that on such date that there is no suspension of redemption and the preconditions to redemption as described in the Bond Terms are all fulfilled, including but not limited to the continued solvency of the Issuer and the approval by the Issuer Supervisor has been obtained. The Issuer is under no obligation to redeem the Tier 2 Bonds at any time before the Maturity Date, and the Bondholders have no right to call for their redemption. If the Issuer does not fulfil its Solvency Condition, the Maturity date may be postponed without any compensation other than the accrual of coupons.
- Interest payments under the Subordinated Tier 2 instrument may be optionally or mandatorily deferred. Any deferred interest is accumulated but will not carry any interest. The interest payment obligations (including any deferred interest) of the Issuer under the Bond Terms is conditional upon the Solvency Condition. Other than in a Bankruptcy Event, no amount will be payable under or arising from the Tier 2 Bonds except to the extent that the Issuer could make such payment in satisfaction of the Solvency Condition. Any actual or anticipated deferral or of interest payments is likely to have an adverse effect on the market price of the Tier 2 Bonds.

# Risk factors (3/4)

#### **Insurance Risk**

- Insurance risk comprise two main types of risk: Underwriting risk and reserving risk. If these risks materialize it may have a negative impact on the Issuer's business and credit rating, which may have a material effect on financial position and results of operations.
- Underwriting risk future profitability depends on the quality of underwriting and risk selection in the various product lines where the Issuer is active. Underwriting risk is the risk that insurance premiums will not be sufficient to cover the compensations and other costs associated with the insurance business. the Issuer is active in several lines of insurance and a failure to properly match premiums with risk may lead to poor profitability and/or inability to cover future claims. Future profitability in the insurance operations depend on the quality of underwriting and risk selection in the various product lines where the Issuer is active.
- Reserving risk current insurance provisions (reserves) may be inadequate should there be future changes in factors that impact these estimates. Reserving risk relates to the risk of the Issuer's insurance provisions being inadequate. The uncertainty associated with the calculation of claims reserves affects results through run-off

#### Investment and market risk

- The Issuer has over time generated a significant part of net profit from its investment portfolio. The investment portfolio is exposed to the risk of loss due to changes in observable market variables such as interest rates, securities prices and exchange rates.
- As at the end of 2020, the Issuer had an Investment portfolio of BNOK 13.5, 86.5% of which was invested in interest bearing instruments and 13.5% in equities. Equities are in general more volatile than fixed income securities.
- Investment portfolio risks declines in financial markets may impact earnings from the investment portfolio, introduce mismatches between assets and insurance liabilities and impact solidity / solvency margin
- Declines in the equity markets and other financial markets may reduce unrealised gains or increase unrealized losses in the Company's investment portfolio, and reduce or eliminate the excess solvency margin of the Company. Such decline could also lead to a mismatch between the liabilities to policyholders and the value of underlying assets notionally backing those liabilities. Although the Issuer seeks to minimise the adverse effect of periods of economic downturn and market volatility by diversifying its investments, there can be no assurance that this strategy will be successful. Investments returns are also susceptible to general economic conditions including changes that impact the general creditworthiness of issuers' debt and equity securities held in the investment portfolio.
- The value of fixed-income securities may be affected by among other things, changes in the Issuer's credit rating. Where the credit rating of an issuer debt security drops, the value of the security may also decline. There is always a risk for defaults by issuers in the fixed income market.
- Interest rate changes to market rates may impact both investment returns and insurance liabilities. The duration (term) in the interest-rate portfolio is 0.4 years as at the end of 2020, unchanged from the end of 2019. The current interest-rate exposure in the investment portfolio is thereby low, however interest also affect the fair value of the insurance liability for solvency calculations. Compensations within long tailed business as worker compensation may be many years in the future and the liability is sensitive to changes in interest rates.
- Foreign exchange the Issuer is exposed to foreign exchange risk from liabilities and investments in various currencies. Foreign exchange risk arise as a result of investments in securities denominated in foreign currencies. In the consolidated financial statements, the value of assets and liabilities from the operations in Sweden, Denmark, the UK and Finland are affected by the changes in SEK, DKK, GBP and EUR. Given the scale of operations in some of these countries, the Issuer does not always hold investments in local currencies to match applicable liabilities. Instead, the company holds investments in other currencies and then utilises forward derivative currency contracts to match the currency of these investments with actual liabilities.

# Risk factors (4/4)

#### Other risks (strategic risk, credit risk, liquidity risk and operational risk)

- The Issuer has historically been competitive through low cost, a loss of this cost advantage may impact future profitability and competitive position. Historically the Issuer has been very cost efficient partly due to in-house IT solutions and operations. Growth has come from entering new geographies and product lines. There is no guarantee that the cost efficiency will persist or that further expansion to new geographies or products will be successful. The strategic risk is further connected with the Issuer's distribution, IT solutions, market flexibility, cooperation partners and reputation and changes in market conditions. A negative development in the Issuers strategic position may have adverse effect on the Company's business, financial position and results of operation.
- Reinsurance is an important part of risk management and claims against reinsurers represent a credit risk. the Issuer is exposed to credit risk through its investments in the bond and money markets and through reinsurance. Investment risk was covered in the preceding section. Credit risk is the risk of loss if the Company's counterparties does not meet their obligations. Outstanding claims against the Company's reinsurers represent a credit risk. The reinsurers used by the Company generally have very strong Investment Grade ratings. the Issuer could experience losses which may have a material adverse effect on the Company's financial position and result of operations in the case of defaults on their obligations by one or more counterparties.
- Liquidity risk is the risk that the Issuer is not able to meet its payment obligations. The liquidity risk is generally low in general insurance, seeing that premium payments fall due before the payments of claims. the Issuer primarily deposits premium payments received in liquid accounts or invests them in liquid securities to ensure that the Company can obtain the necessary liquid funds at any given time. If the Issuer needs to sell assets from the investment portfolio to pay its obligations, and the financial markets at the time is experiencing extreme illiquidity, this might have adverse effect on the Issuer's financial position.
- Operational risk is the risk of financial loss connected with inadequate or failing internal processes or systems, human errors, external events or failure to comply with applicable rules and regulations. the Issuer is highly reliant on data systems for its business operations. Any failure or interruption of these systems could harm the Issuer's ability to carry out its business operations. the Issuer is also highly reliant on the networking infrastructure and may be materially adversely affected by computer hacking and other forms of cybercrime. Technical failures could lead to severe loss of revenue and reputation. the Issuer's business depends on the trust of insurance brokers and customers. Any mismanagement, fraud or failure to comply with regulatory responsibilities, the negative publicity resulting from such activities or allegations of such activities, could damage the Issuer's reputation and adversely affect sales and margins.

## Investment strategy - bonds

Higher risk requires higher margin of safety, hurdle rate = companies with ROE target > 20%

**Analysis / underwriting strategy** 

- Bottom-up analysis (underwriting) and quarterly follow up
  - Bond market often slow to react to deteriorating fundamentals
- Continuous development of process

**Focus areas** 

- Absolute attractiveness of individual risk, e.g.
  - Terms
  - Redundancy, low loss given default
  - Always ensure large margin on safety to intrinsic EV
- Selective, only entering ~5% of new deals with a willingness to sit on the sideline and act aggressively to "grab" good opportunities

**Return evaluations** 

- Capital consumption & return on risk capital
  - Company capital allocation alternatives evaluated
- Hurdle rate for investment = company ROE target > 20%
- Liquidity / ability to change our mind

# Investment strategy - equities

ш					
п	w	ш	Z	O	П

Long term ownership returns

## Type of investments

Good long-term ownership returns through investment in easy and predictable businesses

## **Hurdle rate and margin of safety**

High margin of safety in our investments

## **Analysis**

Keeping the portfolio small, fewer companies allowing for deeper analysis and contrarian variant perception

## **Intensity of competition**

Looking for companies with low intensity of competition – "how to win, pick easy competition"

#### **Focus**

Continuous learnings and improvement of process creating long-term results

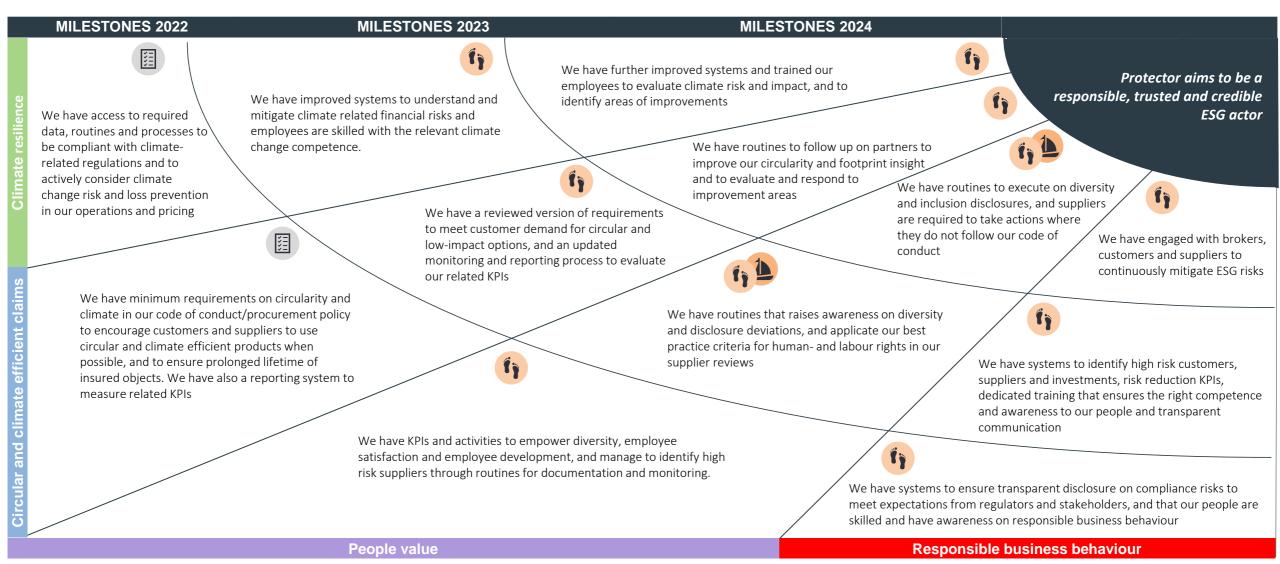

# **ESG** Roadmap

insurance

## A set of required activities that gradually should make us a responsible, trusted and credible ESG actor
